A visit to the old Lester country tells plainly where the old and first settlers are resting, and could they but see the country today, as compared with the time when they were the settlers and farmers, the changes that have been made would seem like fairy tales. Merrihew was greatly excited. He was for ordering a second bottle, but Hillard staved him.

"By George! And you are sure that it was at the Sandfords'?"

"I am positive. But there is a puzzle that I have failed to solve—Sandford's cable and the caretaker's declaration I know that I was in that house. The patrolman says that he has seen no light in the house since the family sailed for Africa. It is no dream, but it begins to look as if I were the victim of some fine hoax."

"It is more than a hoax, in my opinion. Wait till Sandford returns and finds his silver gone." Hillard started.

"And his gold plate," continued Merrihew, pleased with the idea. "My boy, that's what it is-the best dodge I ever heard of. It will make a good story for the Sunday papers. You won't be in it unless she ropes you in as an accomplice." "I'm a romantic ass!" Hillard sighed.

"By the way," he continued, "received a postal from Kitty this morning from Gibraltar. Fine trip. Visited the gun galleries and the antique furniture shops. Says no sign of prima donna O'Mally's on the water wagon. But Kitty aggravates me."

"What has she done now, refused you by marconigraph?"

"No, but she promised me her address."

Nervous Dyspopsia And Neurastha

Weakness of the Nervous System Often Dependent Upon Longcontinued Indigestion.

Neurasthenia, also known as "nervous exhaustion," "nervous debility," and "nervous prostration," is a disease, which in these modern, strenuous times is becoming more and more prevalent. It is a condition in which there is more or less marked and persistent loss of energy, to-

gether with considerable irritability. Persons who suffer from this trouble are easily excited and irritated; cannot do as much work as formerly, and in attempting any mental effort, quickly become confused, and are unable to concentrate the attention. They also complain of insomnia, nervous indigestion, depression of spirits and palpitation of the heart.

There is a general muscular weakin the ears; blurring of eyesight: prolonged intellectual effort is interfered with, and the patient imagines he is losing his memory.

Neurasthenics continually watch for new symptoms, unconsciously exaggerate the old ones, attaching unnow able to be around and his friends due importance to them. Causeless fear is often suffered from; a dread of some impending danger; extreme pessimism; dark forebodings, and hysteria. Sleep is not refreshing, and the person feels much more tired in the morning than at night. Horrible dreams and nightmare are usually complained of.

But by far the most prominent manifestation of Neurasthenia is Nervous Dyspepsia. In nearly every case this disturbance of the stomach dominates the complaint. Cause and effect may be transposed, and dyspepsia may be the result of Neurasthenia but oftener, indigestion is the original cause of the nervous condition. The nerves are simply "starved" becident Friday, a pitchfork being run cause the stomach does not digest the food properly and as the nerves are Farmers are now busily engaged in dependent upon the food which the their sustenance, any deprivation Charles Dewald has recovered from thereof is sure to cause nerve weakhis illness and is again at work in the ness.

> The use of "nerve tonics" in this condition is a mistake; they merely stimulate, but do not rebuild nerve tissue. Completely digested food is the only true nerve builder and strengthener; and in the treatment of nervous exhaustion, one should first cure the nervous dyspensia. which is usually the origin of the trouble by taking STUART'S DYS-PEPSIA TABLETS in doses of one or two after each meal, or whenever needed, and the long train of nervous symptoms will be cured along with the nervous dyspepsia.
